Verifying Benefits & ID Card Options

You don't need an ID card to see a vision provider or to make an appointment. Your vision provider can contact Superior Vision using the information above to verify your coverage over the phone using the UT group number, and your date of birth. To avoid any coverage verification setbacks, please have your provider complete this step prior to your appointment.

Remember to save the most money and maximize your benefits by always double checking with Superior Vision that your eye provider is "in-network" by calling Superior Vision and providing them with the name and address of your eye doctor. If you don't have a specific provider in mind, Superior Vision can help you find one close to your home zip code that is in-network.

- You can register with Superior Vision online via: <https://superiorvision.com/>
 - Once registered, you can view, print, or email your member ID card
- After you register online, you could then download the Superior Vision mobile app to have a digital ID card on your smartphone, view your benefits, search for an in-network dentist, and more:

Superior Vision

Superior Vision

Features:

- Locate an in-network provider
- Review your benefits & the benefits of any dependents
- See which benefits you have used and which benefits are currently available
- View, print, or email your member ID card
